CHARACTERISTICS OF DEGREE PROGRAMME

General and specific learning objectives

The bachelor degree course in Public Management aims at providing:

- integrated managerial competencies deriving from various disciplines (economics, law, management, political science, sociology, statistics);
- in-depth knowledge of public organizations and the way they function;
- a better understanding of the needs of both citizens and firms for services from the public administration;
- the ability to work by projects and objectives;
- strong skills and competencies in using technological tools in administration and communication with the public;
- the ability to recognize and overcome the typical "bureaucracy traps", which often make it difficult for the public administration to work efficiently and effectively.

EXPERIENCE OF STUDY ABROAD AS PART OF THE TRAINING PROGRAM

The University of Milan supports the international mobility of its students, offering them the opportunity to spend periods of study and training abroad, a unique opportunity to enrich their curriculum in an international context.

Study and internships abroad

The degree in Public Management offers the opportunity to study at several European universities, where students will be able to attend lectures and obtain credits for their degree.

Our international partners are selected among the most prestigious academic institutions in Spain (Universidad Pompeu Fabra, in Barcelona, Universitat de Barcelona, University of Santiago de Compostela, Universidad Pública de Navarra, Pamplona, University of Oviedo, University of Salamanca, Universidad Complutense of Madrid, University of La Coruña), France (Université du Droit et de la Santé of Lille), and Portugal (University of Coimbra).

The modules offered by our partners include core subjects and disciplines of Public Management. The choice of modules is made by students before their departure in collaboration with the programme coordinator; the credits are recognized officially and included in the curriculum at the end of the exchange period.

How to participate in Erasmus mobility programs

To gain access to mobility programs for study purposes, lasting 3-12 months, the enrolled students of the University of Milan must attend a public selection that starts usually around the month of February each year through the presentation of specific competition announcements, which contain information on available destinations, respective duration of the mobility, requirements and deadlines for submitting the online application.

The selection, aimed at evaluating the proposed study abroad program of the candidate, knowledge of a foreign language, especially when this is a preferential requirement, and the motivations behind the request, is performed by specially constituted commissions.

Each year, before the expiry of the competition announcements, the University organises information sessions for the specific study course or groups of study courses, in order to illustrate to students the opportunities and participation rules.

To finance stays abroad under the Erasmus + program, the European Union assigns to the selected students a scholarship that - while not covering the full cost of living abroad - is a useful contribution for additional costs as travel costs or greater cost of living in the country of destination.

The monthly amount of the communitarian scholarship is established annually at national level; additional contributions may be provided to students with disabilities.

In order to enable students in economic disadvantaged conditions to participate in Erasmus+ program, the University of Milan assigns further additional contributions; amount of this contributions and criteria for assigning them are established from year to year.

The University of Milan promotes the linguistic preparation of students selected for mobility programs, organising every year intensive courses in the following languages: English, French, German and Spanish.

The University in order to facilitate the organisation of the stay abroad and to guide students in choosing their destination offers a specific support service.
