CHARACTERISTICS OF DEGREE PROGRAMME

General and specific learning objectives

This degree programme aims to provide graduates with a range of specialisations in the fields of public communication, corporate communication, marketing, advertising and market and opinion research. The educational and cultural project of the course intends to offer an advanced and interdisciplinary education and training with a strong opening to the world of enterprise in the domestic and international contexts and to communication activities within public and political organisations.

EXPERIENCE OF STUDY ABROAD AS PART OF THE TRAINING PROGRAM

The University of Milan supports the international mobility of its students, offering them the opportunity to spend periods of study and training abroad, a unique opportunity to enrich their curriculum in an international context.

Study and internships abroad

The MA in Public and Corporate Communication, through the Department of Social and Political Sciences, has signed exchange agreements with the Australian universities "University of South Australia" (Adelaide) and "Griffith University" (Brisbane), the Canadian University "Prince Edward Island", and the American University "George Mason University" (Virginia, USA).

Students can attend a semester in the faculties and graduate courses specified in the agreements, and have their exams recognized, as in the Erasmus program. An excellent knowledge of the English language, properly certified, is required to participate. Special calls establish other conditions to enter the selection. These exchanges do not enjoy any financial support from the University of Milano.

How to participate in Erasmus mobility programs

To gain access to mobility programs for study purposes, lasting 3-12 months, the enrolled students of the University of Milan must attend a public selection that starts usually around the month of February each year through the presentation of specific competition announcements, which contain information on available destinations, respective duration of the

mobility, requirements and deadlines for submitting the online application.

The selection, aimed at evaluating the proposed study abroad program of the candidate, knowledge of a foreign language, especially when this is a preferential requirement, and the motivations behind the request, is performed by specially constituted commissions.

Each year, before the expiry of the competition announcements, the University organises information sessions for the specific study course or groups of study courses, in order to illustrate to students the opportunities and participation rules.

To finance stays abroad under the Erasmus + program, the European Union assigns to the selected students a scholarship that - while not covering the full cost of living abroad - is a useful contribution for additional costs as travel costs or greater cost of living in the country of destination.

The monthly amount of the communitarian scholarship is established annually at national level; additional contributions may be provided to students with disabilities.

In order to enable students in economic disadvantaged conditions to participate in Erasmus+ program, the University of Milan assigns further additional contributions; amount of this contributions and criteria for assigning them are established from year to year.

The University of Milan promotes the linguistic preparation of students selected for mobility programs, organising every year intensive courses in the following languages: English, French, German and Spanish.

The University in order to facilitate the organisation of the stay abroad and to guide students in choosing their destination offers a specific support service.
