

UNIVERSITA' DEGLI STUDI DI MILANO
PROGRAMME DESCRIPTION - ACADEMIC YEAR 2017/18
MASTER DEGREE IN
ECONOMICS AND POLITICAL SCIENCE (EPS) Classi LM-56/LM-62
Enrolled from 2014/2015 academic year

HEADING

Degree classification - Denomination and code: LM-56/LM-62 Economic sciences/Political science

Degree title: Dottore Magistrale

Length of course: 2 years

Credits required for admission: 180

Total number of credits required to complete programme: 120

Course years currently available: 1st , 2nd

Access procedures: open, subject to entry requirements

Course code: B67

PERSONS/ROLES

Head of Study Programme

Prof. Giorgio Barba Navaretti

Tutors - Faculty

CHARACTERISTICS OF DEGREE PROGRAMME

Introduction

The two-year masters degree in Economics and Political Science (EPS) aims at developing a highly qualified learning track in the fields of economics and political science.

In modern times economics and political science have been growing out of the same trunk, represented by moral and political philosophy. While drawing their origin and inspiration from this common matrix, the two fields have soon organised themselves according to autonomous epistemological statutes, to which distinct conceptual frameworks correspond. Nevertheless they have preserved their tight relationships, mutually affecting one another over the centuries.

Indeed, not only their common origin, but also the extensive sharing of the very object of study have fostered the methodological and theoretical similarities between the two social sciences. Over the last two centuries, in particular, the increased public intervention in the economic sphere in all types of socio-economic systems, market economies included, has drawn the two disciplines closer, making them face a common set of issues and questions.

In present-day research activity one can find countless instances of theoretical and empirical investigations where the boundaries between the two sciences become blurred and the tools and methods of analysis - from rational choice theory to game theory, from political philosophy to econometrics, from the theory of justice to welfare economics - turn out to be essentially the same. To cite just a few examples, one can mention the analysis of individual and collective choice in both the economic and the political field; the examination of the relationships existing between political institutions on one hand and economic growth or social welfare on the other; the discussion of public policies and their effects on individual and aggregate economic variables; the study of the interaction between government actions and business cycles.

General and specific learning objectives

The design of the EPS master's degree is highly innovative in the Italian university system. Even if inter-disciplinary second-level degrees are not altogether missing in the Italian context, no two-year master's degree in economics and politics is presently offered by any Italian university.

What is inexistent in Italy, however, is common in the academic tradition of most EU and non-EU countries. In the English-speaking world, in particular, the undergraduate and graduate programmes in Philosophy, Politics and Economics have represented for more than a century the privileged access to prestigious professional careers in both the economic and the political field, in public and private sectors alike. Similar experiences are also familiar in the French- and German-speaking university systems.

These deeply rooted traditions are another factor behind the intention of organising the EPS degree as a fully internationalised programme, promoting mobility and joint degree agreements with similar courses offered by foreign universities. The language of instruction is English.

Expected learning outcomes

The EPS master's programme aims at providing its students with advanced and complete training in both economics and political science. Such training should be comparable to that offered by any leading international master's programme in each of the two disciplines separately taken.

Specifically, the EPS master's programme aims at forming professional economists and political scientists. EPS graduates will not only be endowed with high-level analytical and operational skills, but they will also be characterised by such an open and critical vision of economic, political and social issues, and such a cultural depth that could hardly be achieved by attending a programme centred on a single or prevailing disciplinary field.

EPS students will be able to reach highly qualified theoretical and applied knowledge and skills in each of the following fields: mathematics, probability and statistics, with applications to economic, political and social sciences; econometrics; microeconomics; macroeconomics; economic policy; public economics; welfare economics and politics; history of economic analysis; comparative politics, theory of European integration; positive and normative political theory; decision theory; game theory; social and political choice theory; theory of justice.

Professional profile and employment opportunities

The EPS degree is designed to train students in advanced methodologies, analytical tools and quantitative and qualitative techniques used in all fields of economics and political science.

EPS graduates will be ready to undertake a wide array of career paths in multinational companies, political institutions, public organizations, and other professions demanding high intellectual skills, robust technical competencies and versatile knowledge. They will also be well prepared to engage in further academic research in top PhD programmes.

Pre-requisites for admission

The programme is intended for top level international students. About 40 students are expected to enrol each year, which will guarantee an optimal ratio between instructors and students.

Admission is based on academic excellence. Applicants should have a bachelor's degree or equivalent; a strong interest and/or previous studies in economics, political science or related subjects; undergraduate or graduate training in mathematics and quantitative methods or a strong motivation to quickly fill their gaps in these fields; a sound knowledge of spoken and written English. The evaluation process will take into consideration the applicants' prior academic record, their motivation and performance at the interview (see below).

More specifically, applicants who obtained their bachelor's degrees from Italian Universities are eligible for admission if they hold a "laurea" degree belonging to any one of the "classi di laurea" (degree classes) listed below under the heading "Note 1".

Applicants who completed their undergraduate studies in foreign Universities are eligible for admission if they hold a bachelor's degree in economics, political science, or other broadly related subjects (from history to industrial engineering, from management to mathematics, from philosophy to sociology, and so on), provided that their bachelor's degree may be regarded as equivalent to one of the Italian "laurea" degrees listed below.

Eligible candidates must meet the following requirements:

a) They must have earned at least 60 ECTS credits or equivalent in the following fields: business administration, computer science, economics, law, management, mathematics, philosophy, political science, sociology or statistics. The ECTS credit value of foreign applicants' undergraduate studies will be assessed by the EPS admissions committee. Applicants holding an Italian bachelor's degree must have earned the required credits within the set of admissible "settori scientifico-disciplinari" (disciplinary scientific sectors) listed below under the heading "Note 2".

Among these, at least 6 credits should have been earned within the following "settori-scientifico disciplinari" (disciplinary

scientific sectors): MAT/01 - Logica matematica ; MAT/02 – Algebra; MAT/03 – Geometria; MAT/05 - Analisi matematica ; MAT/06 - Probabilità e statistica matematica ; MAT/08 - Analisi numerica; MAT/09 - Ricerca operativa ; SECS-S/06 - Metodi matematici dell'economia e delle scienze attuariali e finanziarie.

Applicants who completed their undergraduate studies in foreign Universities should exhibit a comparable academic record or competence in logics, statistics and mathematics.

Candidates who have not already earned 6 credits in these disciplines, should satisfy the admission requirements before being admitted to the EPS programme by following a preliminary course on mathematical and quantitative topics that will be held before the beginning of the normal courses.

b) Non-native speakers of English must be able to demonstrate their knowledge of English either by showing they have at least one year of university studies at institutions where the language of instruction is English, or during the interview. The possessing of a IELTS or TOEFL will also be taken into account

c) A GRE or GMAT will be taken into account

Applicants meeting the above requirements will be invited to an interview. Interviews may be held on-site or by videoconference (see below).

Programme structure

The EPS degree is a genuinely multidisciplinary programme, presenting a balanced offer of courses in economics and political science, introduced by a few supplementary courses in mathematics, game theory and quantitative and qualitative research methods.

Students must earn 120 ECTS credits to complete programme requirements; among them, 33 credits (27.5% of the total) are dedicated to additional educational and research activities, for example dissertation writing, research seminars and elective courses.

Campus

Faculty of Political, Economic and Social Sciences - Via Conservatorio, 7 - 20122 MILANO

Language test / computer literacy test

Test of advanced knowledge of languages. Test of advanced computer skills.

Study plan definition and submission for approval

Students may choose a complete study plan starting from the first year

Degree programme final exam

The final exam consists in the submission and public discussion, in front of a committee, of a master's dissertation. The master's dissertation is an original piece of work, written by the candidate under the guidance of a supervisor.

Criteria for admission to degree course final exam

Having earned at least 99 credits for the learning activities contemplated by his/her study plan, a student may be admitted to undertake the final exam leading to the award of the master's degree.

A total of 21 credits are reserved to the design, preparation and writing up of the master's dissertation.

The formal assignment of these credits can only take place at the moment when the dissertation is completed and discussed and the final exam is passed.

EXPERIENCE OF STUDY ABROAD AS PART OF THE DEGREE PROGRAM

The University of Milan supports the international mobility of its students, offering them the opportunity to spend periods of study and training abroad, a unique opportunity to enrich their curriculum in an international context.

Study and internships abroad

The degree in Economics and Political Science offers the opportunity to study at several European universities, where students will be able to attend lectures and obtain credits for their degree.

Our partners are selected among the most prestigious academic institutions in France (SciencesPo), Germany (University of Mannheim), Spain (Carlos III University), Norway (University of Oslo), and other European countries. A bilateral agreement with the Catholic University of Louvain (Belgium) allows a limited number of students to obtain a double degree in Sciences Economique and Economics and Political Science issued by both institutions. Moreover, an exchange with the HSBC Business School, Peking University Shenzhen (China) has been running since 2014. Finally, new Exchange programs with Plekhanov Russian University of Economics (Moscow, Russian Federation), Singapore School of Management and Manipal University (Karnataka, India) have been activated in the a.y. 2016-17. The modules offered by our partners include core subjects and disciplines of Economics and Political Science such as Industrial Organization, Welfare Economics, European Law, Comparative and International Politics. The choice of modules is made by students before their departure in collaboration with the programme coordinator; the credits are recognized officially and included in the curriculum at the end of the exchange period.

The degree in Economics and Political Science also offers the opportunity to participate in internship programmes at institutions such as the European Social Observatory, European Trade Union Institute, and the European Anti-Poverty Network (Brussels), the Consejo Superior de Investigaciones Cientificas (Barcelona), and the Italian Chamber of Commerce in Hong Kong. Internships may also earn students credits to be included in their curriculum.

How to participate in Erasmus mobility programs

To gain access to mobility programs for study purposes, lasting 3-12 months, the enrolled students of the University of Milan must attend a public selection that starts usually around the month of February each year through the presentation of specific competition announcements, which contain information on available destinations, respective duration of the mobility, requirements and deadlines for submitting the online application.

The selection, aimed at evaluating the proposed study abroad program of the candidate, knowledge of a foreign language, especially when this is a preferential requirement, and the motivations behind the request, is performed by specially constituted commissions.

Each year, before the expiry of the competition announcements, the University organises information sessions for the specific study course or groups of study courses, in order to illustrate to students the opportunities and participation rules.

To finance stays abroad under the Erasmus + program, the European Union assigns to the selected students a scholarship that - while not covering the full cost of living abroad - is a useful contribution for additional costs as travel costs or greater cost of living in the country of destination.

The monthly amount of the communitarian scholarship is established annually at national level; additional contributions may be provided to students with disabilities.

In order to enable students in economic disadvantaged conditions to participate in Erasmus+ program, the University of Milan assigns further additional contributions; amount of this contributions and criteria for assigning them are established from year to year.

The University of Milan promotes the linguistic preparation of students selected for mobility programs, organising every year intensive courses in the following languages: English, French, German and Spanish.

The University in order to facilitate the organisation of the stay abroad and to guide students in choosing their destination offers a specific support service.

More information in Italian are available on www.unimi.it > Studenti > Studiare all'estero > Erasmus+

For assistance please contact:

Ufficio Accordi e relazioni internazionali

via Festa del Perdono 7 (ground floor)

 Fax 02 503 13503
 E-mail: mobility.out@unimi.it
 Desk opening hour: Monday-friday 9 - 12

ADMISSION CRITERIA: 1ST YEAR OPEN, SUBJECT TO ENTRY REQUIREMENTS

Practical instructions

Applicants, both foreign and Italian holding a bachelor's degree or expecting to obtain it by December 31st, 2017, must apply for admission to the EPS programme from February 1th to September 12th, 2017.

Non EU Applicants from outside Italy holding a non-Italian bachelor's degree or expecting to obtain it by December 31st, 2017, must submit a pre-application at the Italian Embassy of their own country.

Applicants will be selected on the basis of an interview, which aim is to ascertaining the applicants' motivations as well as their personal knowledge, competences, and skills in the core areas of the EPS programme. For an idea of the appropriate level of knowledge, competences, and skills, candidates may consult the following textbooks:

Economics:

- Blanchard O., Macroeconomics, 5th edition, Pearson Prentice-Hall, Upper Saddle River, N.J., 2010.
- Varian H., Intermediate Microeconomics. A Modern Approach, 8th edition, Norton, New York, N.Y., 2009.

Political science:

- Clark W.R., Golder M. and Golder S.N., 2nd edition, Principles of Comparative politics, Washington DC, CQ Press, 2012

Quantitative methods (introductory calculus and linear algebra):

- Haeusserl E. F., R. S. Paul, R. J. Wood, Introductory Mathematical Analysis for Business, Economics, and the Life and Social Sciences, 13th edition, Pearson Prentice Hall, Upper Saddle River, 2010. Chapters: 0-6, 9-19.
- Simon C. P., L. Blume, Mathematics for Economists, W.W. Norton and Co., New York and London, 1994. Chapters 1-11.

Applicants who submit their application from February to July will be contacted for a skype interview.

Applicants who submit their application from August to the deadline will be contacted for the on-site interview at the University of Milan, Faculty of Political, Economic and Social Sciences, DEMM seminar room, II floor, Via Conservatorio, 7, Milan (more information will be available at www.eps.unimi.it).

Further detailed information concerning the EPS programme are available at www.eps.unimi.it, or contact the programme director, prof. Giorgio Barba Navaretti, Department of Economics, Management and Quantitative Methods: tel. +39 02 503-21521; or the programme secretariat: eps@unimi.it; tel. +39 02 503-21527; fax +39 02 503-21505.

N° of places reserved to non-EU students resident abroad

30

ADMISSION CRITERIA: 2°YEAR

Notes

EPS does not accept transfer students at the second year. If interested, the student has to follow the admission process as a first year student. Nevertheless, his/her previous exams may be recognized as EPS exams.

1st COURSE YEAR Core/compulsory courses/activities		
Learning activity	Ects	Sector
Advanced macroeconomics	6	SECS-P/01
Advanced microeconomics	6	SECS-P/01
Comparative politics	9	SPS/04
Game theory	6	SECS-P/01
International economic law	6	IUS/13
Optimization	6	SECS-S/06
Positive political theory	9	SPS/04
Research methods	12	SPS/04, SECS-P/05
Total number of compulsory credits/ects		60
2nd COURSE YEAR Core/compulsory courses/activities		
Learning activity	Ects	Sector
Global firms and markets	12	SECS-P/08
Total number of compulsory credits/ects		12
Electives		
Students must earn 9 credits by selecting one of the following alternatives:		
Comparative welfare states	9	SECS-P/03
Empirical methods for economics and policy evaluation	9	SECS-P/03, SECS-P/01
Students must earn 6 credits by selecting one of the following alternatives:		
Governance of the European Union	6	SPS/04

Social justice in a global world		6	SPS/04
Further electives			
Students must earn 9 credits for elective activities			
Students must earn 3 credits by selecting one of the following alternatives: Foreign language: advanced; Computer skills: advanced; Internship; Laboratory; Orientation seminars			
Advanced computer skills		3	INF/01
Advanced foreign language: french		3	L-LIN/04
Advanced foreign language: german		3	L-LIN/14
Advanced foreign language: spanish		3	L-LIN/07
Orientation seminar		3	SECS-P/01
End of course requirements			
Final exam		21	
	Total number of compulsory credits/ects	21	

COURSE PROGRESSION REQUIREMENTS

1. Optimization is propaedeutic to Global firms and markets
2. Game theory is propaedeutic to Global firms and markets, Positive political theory, International political economy
3. Advanced microeconomics is propaedeutic to Advanced macroeconomics
4. Advanced macroeconomics and Research methods are propaedeutic to International political economy and Global firms and markets
