**HEADING**

| **Degree classification - Denomination and code:** | LM-91 Techniques and methods for the Information Society |
| **Degree title:** | Dottore Magistrale |
| **Length of course:** | 2 years |
| **Credits required for admission:** | 180 |
| **Total number of credits required to complete programme:** | 120 |
| **Years of course currently available:** | 1st |
| **Access procedures:** | Open, subject to completion of self-assessment test prior to enrolment |
| **Course code:** | B74 |

**PERSONS/ROLES**

**Head of Study Programme**  
Prof.ssa Silvia Salini

**Tutors - Faculty**  
Prof. Stefano Maria Iacus  
Prof. Fabrizio Iacone  
Prof. Alfio Ferrara  
Prof. Nicolò Cesa-Bianchi

**Degree Course website**

**EXPERIENCE OF STUDY ABROAD AS PART OF THE TRAINING PROGRAM**

The University of Milan supports the international mobility of its students, offering them the opportunity to spend periods of
study and training abroad, a unique opportunity to enrich their curriculum in an international context.

**Study and internships abroad**

One of the most effective policies adopted by European Union in the last years has been the internationalization of higher education. The various Erasmus programmes that have been implemented since the nineties have greatly increased the mobility of European students.

Being a brand-new programme with an internationally oriented educational core strategy, DSE promotes a wide internationalization of their students, and therefore strongly encourages them to spend part of their studies abroad in Erasmus+ Programmes.

Erasmus+ provides opportunities to study, train, gain work experience and skills. Students can go abroad from 3 up to 12 months (including a complementary traineeship period, if planned), and may receive additional grants for studying or training. At the end of their foreign stay, students get full recognition of completed activities in terms of credits for their degree. Student mobility is carried out in the framework of prior “inter-institutional agreements” between the sending and receiving institutions.

Students can also join the traineeship programme (Placement), by going abroad from 2 up to 12 months, starting their traineeship from the first year of study. For a traineeship which is an integral part of the curriculum, the sending institution must give full academic recognition for the period spent abroad. For a traineeship that is not part of the curriculum of the student, the sending institution shall provide recognition at least by recording this period in the Diploma Supplement or, in the case of recent graduates, by providing a traineeship certificate. Traineeship may also be established with private and public companies, educational or research centers other than the hosting institution, especially in the field of finance.

DSE academic staff has strong relations with some important European universities, in particular in Germany, Belgium, France, Spain and the Netherlands, and is actively involved in research and education networks, so that students’ activity abroad (including the development of the final dissertation) can be successfully supervised.

**How to participate in Erasmus mobility programs**

To gain access to mobility programs for study purposes, lasting 3-12 months, the enrolled students of the University of Milan must attend a public selection that starts usually around the month of February each year through the presentation of specific competition announcements, which contain information on available destinations, respective duration of the mobility, requirements and deadlines for submitting the online application.

The selection, aimed at evaluating the proposed study abroad program of the candidate, knowledge of a foreign language, especially when this is a preferential requirement, and the motivations behind the request, is performed by specially constituted commissions.

Each year, before the expiry of the competition announcements, the University organises information sessions for the specific study course or groups of study courses, in order to illustrate to students the opportunities and participation rules.

To finance stays abroad under the Erasmus + program, the European Union assigns to the selected students a scholarship that - while not covering the full cost of living abroad - is a useful contribution for additional costs as travel costs or greater cost of living in the country of destination.

The monthly amount of the communitarian scholarship is established annually at national level; additional contributions may be provided to students with disabilities.

In order to enable students in economic disadvantaged conditions to participate in Erasmus+ program, the University of Milan assigns further additional contributions; amount of this contributions and criteria for assigning them are established from year to year.

The University of Milan promotes the linguistic preparation of students selected for mobility programs, organising every year intensive courses in the following languages: English, French, German and Spanish.

The University in order to facilitate the organisation of the stay abroad and to guide students in choosing their destination offers a specific support service.

### Activities chosen by the student

**ECONOMICS (Suggested Path)**

(3 activities among the following, but not more than 2 among those marked by *)

Total 18 credits/ects

- Clustering and Probabilistic Modelling
- Datamining and Computational Statistics
- Economics of Government and Policy Evaluation
- Experimental Methods and Behavioural Economics
- Game Theory
- Global Firms and Markets
- Industrial Organization and Competitive Policies
- Knowledge Extraction and Information Retrieval
- Labour Economics and Policy Evaluation
- Mathematical Methods for Finance
- Numerical Methods for Finance
- Patients’ Needs and Healthcare Markets
- Portfolio Optimization
- Quantum Finance
- Risk Management
- Social Network Analysis
- Statistical Methods for Finance
- Text Mining and Sentiment Analysis

Total 18 credits/ects

**BUSINESS INNOVATION (Suggested Path)**

(3 activities among the following)

Total 18 credits/ects

- Digital Business Strategies
- Fintech Industry
- Human Resource Management Via Workforce Analytics
- Intellectual Property for Business: Strategy and Analysis
- Marketing Analytics
- Open Data for New Business
- Project Managements and Innovation in the Era of Big Data
- Social Network Analysis for Business and Organization

Total 18 credits/ects

**SOCIAL SCIENCE (Suggested Path)**

(3 activities among the following)

Total 18 credits/ects

- Clustering and Probabilistic Modelling
- Communication Research
- Datamining and Computational Statistics
- Game Theory
- Knowledge Extraction and Information Retrieval
- Polimetrics
- Public Opinion Analysis
- Social Network Analysis
- Text Mining and Sentiment Analysis
**Other learning activities chosen by the student**

Students must earn 12 credits for elective activities.
