

UNIVERSITA' DEGLI STUDI DI MILANO
PROGRAMME DESCRIPTION - ACADEMIC YEAR 2021/22
BACHELOR

Human Science of Environment, Landscape and Territory (Classe L-6)
Enrolled from 2021/2022

HEADING

Degree classification - Denomination and code:	L-6 Geography
Degree title:	Dottore
Length of course:	3 years
Total number of credits required to complete programme:	180
Years of course currently available:	1st
Access procedures:	Open, subject to completion of self-assessment test prior to enrolment
Course code:	C37

PERSONS/ROLES

Head of Study Programme

Prof.ssa Alice Giulia Dal Borgo

Tutors - Faculty

Tutor per l'orientamento - Academic guidance tutor

Lucchesi Flavio

Tutor per stage e tirocini - Internship tutor

Bergaglio Maristella

Tutor per la mobilità internazionale e l'Erasmus - Erasmus and international mobility tutor

Dal Borgo Alice Giulia

Tutor per i piani di studio - Study plan tutor

Mastropietro Eleonora

Tutor per trasferimenti - University and programme transfer tutor

Bonardi Luca

CHARACTERISTICS OF DEGREE PROGRAMME

General and specific learning objectives

The Bachelor's degree programme in Human Science of Environment, Landscape and Territory aims to train graduates with strong skills in physical and human geography, and the applications thereof. Students will also learn the fundamental theoretical and methodological bases of geography, physical geography, psychology, anthropology, law, economics, sociology, history, literature, art and urban-planning. They will thus learn how to conduct a scientific analysis of territorial systems and the cultural landscape, in order to assess the environmental and social impact of human action on territorial systems. With a view to professional training, the degree programme includes two specific guided tracks. The first one is oriented towards territory enhancement, with a focus on the tourism sector. The second one focuses on the environment and sustainable development.

In compliance with the principles of European harmonization, the final qualifications of the first cycle may be awarded to students with the required skills in geography and other areas of the humanities and natural sciences, who have honed,

through a global and synthetic study approach, the ability to use the analytical and interpretative tools of geography and human sciences for the interpretation, representation and communication of the construction and evolution of environments, territories, landscapes, cultures and societies.

These skills will be supported by proficiency in at least one language of the European Union, in addition to Italian, and by the ability to use IT tools in document collection, information processing and management, cartographic representation and communication to the public.

Graduates will be able to enter the world of work with conceptual and operational skills as well as a sound theoretical education.

Learning outcomes will be assessed through exams, laboratory or internship activities and the final paper.

Expected learning outcomes

The degree programme in Human Sciences of Environment, Landscape and Territory aims to train graduates with strong skills in physical and human geography, and the applications thereof. Students will also be trained in the fundamental theoretical and methodological bases in the geographical, physical, psychological, anthropological, legal, economic, social, historical, literary, artistic and urban-planning disciplines. They will thus learn how to conduct a scientific analysis of territorial systems and the cultural landscape, in order to assess the environmental and social impact of human action on territorial systems. With a view to professional training, the degree programme includes two specific guided courses. The first one is oriented towards territory enhancement, with a focus on the tourism sector. The second one focuses on the environment and sustainable development.

In compliance with the principles of European harmonization, the final qualifications of the first cycle can be awarded to students provided with the required skills in geography and other areas of the humanities and natural sciences, who have achieved, through a global and synthetic study approach, the ability to use the analytical and interpretive tools of geography and human sciences for the interpretation, representation and communication of the construction and evolution of environments, territories, landscapes, cultures and societies.

These skills will be supported by good knowledge of at least one language of the European Union, in addition to Italian, and by the ability to use IT tools in document collection, information processing and management, cartographic representation and communication to the public.

Graduates will be able to enter the world of work with conceptual and operational skills as well as a sound theoretical education.

Learning outcomes will be assessed through exams, laboratory or internship activities and the final paper.

Professional profile and employment opportunities

Graduates may work in public and private institutions requiring professionals with the specific skills provided by the degree programme, as well as in: representation and analysis of the territory, identification and enhancement of resources and the related economic and political phenomena, promotion of cultural and natural tourism, intercultural management. There are also employment opportunities in specialized publishing.

For the above-mentioned purposes, the degree programme includes training activities providing operational skills, also with reference to cultural and environmental services.

Notes

To obtain the degree, students are required to demonstrate an English language proficiency at level B1 within the Common European Framework of Reference for Languages (CEFR). This level can be assessed in the following ways:

- by submitting the language certificate achieved no more than three years prior to the submission, at level B1 or higher, recognised by the University (the list of recognised language certificates can be found at: <https://www.unimi.it/en/study/language-proficiency/placement-tests-entry-tests-and-english-courses>). The language certificate must be uploaded during the admission process;

- by taking the Placement Test, organised by SLAM exclusively during the first year, from October to December. Students who fail to reach level B1 will have to attend an English course organised by SLAM. The Placement Test is compulsory for all students who do not have a valid language certificate.

Students who do not take the Placement Test within the deadline and students who fail the SLAM end-of-course test within six attempts will have to obtain a language certificate within the year in which the language exam is scheduled.

EXPERIENCE OF STUDY ABROAD AS PART OF THE TRAINING PROGRAM

The University of Milan supports international mobility by providing its students with the opportunity to spend study and internship periods abroad. It is a unique chance to enrich your educational path in a new exciting environment.

The agreements entered into by the University with over 300 universities from 30 different countries under the European Erasmus+ programme allow regularly enrolled students to carry out part of their studies at one of the partner universities or

to undertake internships at companies, training and research centres and other organizations.
 Similar international mobility opportunities are provided outside Europe, through agreements with a number of prestigious institutions.

Study and internships abroad

The Study Programme promotes student mobility abroad, especially through Erasmus. We also have numerous Erasmus students from European universities.

Students interested in Erasmus mobility can attend dedicated meetings with the contact person for the Study Programme, and ask specific questions regarding the call for applications, available locations and exams to be taken abroad.

Our partner universities are in France, Germany and Poland.

Current international agreements are available at the following link: <https://www.unimi.it/it/internazionale/la-statale-nel-mondo/accordi-internazionali>

How to participate in Erasmus mobility programs

The students of the University of Milan can participate in mobility programmes, which last 3 to 12 months, through a public selection procedure.

Ad hoc commissions will evaluate:

- the candidate's proposed study programme abroad
- his/her foreign language proficiency
- the reasons behind his/her application

Call for applications and informative meetings

The public selection generally begins around February each year with the publication of a call for applications specifying the destinations, with the respective programme duration, requirements and online application deadline.

Every year, before the deadline for the call, the University organizes informative meetings to illustrate opportunities and rules for participation to students.

Erasmus+ scholarship

The European Union grants the winners of the Erasmus+ programme selection a scholarship to contribute to their mobility costs, which is supplemented by the University funding for disadvantaged students.

Language courses

Students who pass the selections for mobility programmes can benefit from intensive foreign language courses offered each year by the University.
