

# UNIVERSITA' DEGLI STUDI DI MILANO PROGRAMME DESCRIPTION - ACADEMIC YEAR 2021/22 SINGLE-CYCLE DEGREE

# Medicine and Surgery - San Paolo Hospital Location (Classe LM-41) Enrolled from 2015/15 Academic Year to 2017/18 Academic Year

HEADING	
Degree classification - Denomination	LM-41 Medicine and surgery
and code:	
Degree title:	Dottore Magistrale
Length of course:	6 years
Total number of credits required to	360
complete programme:	
Years of course currently available:	5th, 6th
Access procedures:	Cap on student, student selection based on entrance test
Course code:	D53

# PERSONS/ROLES

### **Head of Study Programme**

Prof. Luca Mario Rossetti

# EXPERIENCE OF STUDY ABROAD AS PART OF THE TRAINING PROGRAM

The University of Milan supports the international mobility of its students, offering them the opportunity to spend periods of study and training abroad, a unique opportunity to enrich their curriculum in an international context. To this end, the University adheres to the European Erasmus+ program within which agreements with over 300 universities in over 30 countries have been signed. Under this program, students can attend one of these universities in order to pursue training in substitution of part of the curriculum foreseen by the chosen study course, including internships at companies, research and training centers or other organizations, or even to prepare their thesis. The University also maintains relationships with several other prestigious foreign institutions offering similar opportunities even within higher study levels.

## Study and internships abroad

During the course in Medicine and Surgery at the Polo San Paolo, each student has the opportunity to attend part of her/his academic training abroad for 1 to 12 months. The international experience can be achieved through both institutional channels like the European project Erasmus or IFMSA (International Federation of Medical Students Associations)- associated with the Italian Society of Students in Medicine (SISM)project "Clerkship" or initiatives peculiar of the course of study (i.e. project 3E).

The offer covers both clinical and preclinical disciplines. However there is a greater tendency to take advantage of the experience in the clinical disciplines.

In particular for the Erasmus project, exchanges are currently active with universities of the following European countries: Austria, Belgium, Finland, France, Germany, Poland, Romania, Spain, and Hungary. For the project "Clerkship" the window of opportunity is extended to non-European countries, particularly in North and South America. Since the academic year 2013-2014 the Department of Health Sciences, where the course of study takes place, supports the project "Clerkship" sponsoring three scholarships for a frequency of 4 weeks.

All the training activities carried out abroad must be authorized by the College of the course of study. The acknowledgement of all or part of these activities is obtained in accordance with the provisions by the European Credit Transfer Systems (ECTS) and concurs for the achievement of the degree. The conversion of the records in the current used marks (30/30) is in accordance with the tables approved in the Academic Senate.

The "3E" project aims to stimulate even brief experiences - on a voluntary basis - abroad, the initiative is rewarded with the recognition of a elective credit in the discipline subject of the frequency, and by the provision of a voucher for books of variable amount depending on the selected country.

### How to participate in Erasmus mobility programs

To gain access to mobility programs for study purposes, lasting 3-12 months, the enrolled students of the University of Milan must attend a public selection that starts usually around the month of February each year through the presentation of specific competition announcements, which contain information on available destinations, respective duration of the mobility, requirements and deadlines for submitting the online application. The selection, aimed at evaluating the proposed study abroad program of the candidate, knowledge of a foreign language, especially when this is a preferential requirement, and the motivations behind the request, is performed by specially constituted commissions. Each year, before the expiry of the competition announcements, the University organises information sessions for the specific study course or groups of study courses, in order to illustrate to students the opportunities and participation rules. To finance stays abroad under the Erasmus + program, the European Union assigns to the selected students a scholarship that - while not covering the full cost of living abroad - is a useful contribution for additional costs as travel costs or greater cost of living in the country of destination. The monthly amount of the communitarian scholarship is established annually at national level; additional contributions may be provided to students with disabilities.

In order to enable students in economic disadvantaged conditions to participate in Erasmus+ program, the University of Milan assigns further additional contributions; amount of this contributions and criteria for assigning them are established from year to year. The University of Milan promotes the linguistic preparation of students selected for mobility programs, organising every year intensive courses in the following languages: English, French, German and Spanish.

The University in order to facilitate the organisation of the stay abroad and to guide students in choosing their destination offers a specific support service.
