

UNIVERSITA' DEGLI STUDI DI MILANO
PROGRAMME DESCRIPTION - ACADEMIC YEAR 2022/23
BACHELOR
PhysioTherapy (Classe L/SNT2)
Enrolled since 2020/21 Academic Year

HEADING

Degree classification - Denomination and code:	L/SNT2 Health professions for rehabilitation
Degree title:	Dottore
Length of course:	3 years
Total number of credits required to complete programme:	180
Years of course currently available:	1st , 2nd , 3rd
Access procedures:	Cap on student, student selection based on entrance test
Course code:	D67

PERSONS/ROLES

Head of Interdepartmental Study Programme

Prof. Antonino Michele Previtera

Tutors - Faculty

Per l'orientamento:

prof. Antonino Michele Previtera

per la mobilità internazionale e l'Erasmus

prof. Antonino Michele Previtera

Per i piani di studio:

prof. Antonino Michele Previtera

Per stage e tirocini:

dott.ssa Silvia Maria Cupello

Per laboratori e altre attività:

dott.ssa Rita Russo

Per tesi di laurea:

prof. Antonino Michele Previtera

Per i trasferimenti:

dott. Riccardo Parelli

Per ammissioni lauree magistrali:

dott. Riccardo Parelli

Per riconoscimento crediti:

prof. Antonino Michele Previtera

EXPERIENCE OF STUDY ABROAD AS PART OF THE TRAINING PROGRAM

The University of Milan supports international mobility by providing its students with the opportunity to spend study and internship periods abroad. It is a unique chance to enrich your educational path in a new exciting environment.

The agreements entered into by the University with over 300 universities from the 27 EU member countries under the European Erasmus+ programme allow regularly enrolled students to carry out part of their studies at one of the partner universities or to undertake internships at companies, training and research centres and other organizations.

Similar international mobility opportunities are provided outside Europe, through agreements with a number of prestigious institutions.

Study and internships abroad

The Degree in Physiotherapy has a long-standing tradition of international exchanges.

The Erasmus programme (which stands for European Region Action Scheme for the Mobility of University Students) was founded in 1987 thanks to the efforts of the European Community. It gives students the opportunity to complete a for-credit study-abroad period on an international campus partnering with the student's home campus.

In terms of study-abroad options, the Degree in Physiotherapy currently offers Year III students pre-professional opportunities in the form of an internship.

To that end, we have identified prestigious European partners in Portugal (Egas Muniz and Setubal – 4 places), Spain (Madrid and Lleida – 3 places), France (Lyon – 2 places) Poland (Kielce – 3 places), Czech Republic (Prague – 1 place) and Romania (Arad – 1 place).

In addition to the bilateral agreements, the Erasmus Plus programme contemplates the possibility of two instructors for each Campus in order to have international mobility.

The study-abroad period is three months, with the possibility of earning 20 ECTS, which transfer in as 20 academic credits for the student.

Student feedback has been roundly positive, finding inspiration for thesis development, and developing contacts that have served well over the years, including employment opportunities after graduation.

The Erasmus experience and international exchange are not just a university experience, but an opportunity to learn from, and live with, persons of a different culture and language. It's about more than learning a different language: it's a chance for the student to begin to take on responsibilities and to feel a part of a professional community that includes students from different countries.

How to participate in Erasmus mobility programs

The students of the University of Milan can participate in mobility programmes, through a public selection procedure.

Ad hoc commissions will evaluate:

- Academic career
- the candidate's proposed study programme abroad
- his/her foreign language proficiency
- the reasons behind his/her application

Call for applications and informative meetings

The public selection for Erasmus+ mobility for study generally begins around February each year with the publication of a call for applications specifying destinations and requirements. Regarding the Erasmus+ Mobility for Traineeship, the University of Milan usually publishes two calls a year enabling students to choose a destination defined by an inter-institutional agreement or to find a traineeship position on their own.

The University organizes informative meetings to illustrate mobility opportunities and rules for participation.

Erasmus+ scholarship

The European Union grants the winners of the Erasmus+ programme selection a scholarship to contribute to their mobility costs, which may be supplemented by the University funding for disadvantaged students.

Language courses

Students who pass the selections for mobility programmes can benefit from intensive foreign language courses offered each year by the University.

COURSE PROGRESSION REQUIREMENTS

The course contains the following obligatory or advised prerequisites

Learning activity	Prescribed foundation courses	O/S
Principles of rehabilitation and physiotherapy	Human morphology	Core/compulsory
	Physics and statistics	Core/compulsory
	Functional anatomy of the locomotor and nervous system	Core/compulsory
Placement year iii	Placement year ii	Core/compulsory
Placement year ii	Placement year i	Core/compulsory

Methods and technologies in rehabilitation	Neuro-musculoskeletal and visceral rehabilitation	Core/compulsory
Interdisciplinary surgery course	Physiology and pathology	Core/compulsory
Interdisciplinary clinic course	Physiology and pathology	Core/compulsory
Neuro-musculoskeletal and visceral rehabilitation	Principles of rehabilitation and physiotherapy	Core/compulsory
	Neuro musculoskeletal course	Core/compulsory
Neuro musculoskeletal course	Functional anatomy of the locomotor and nervous system	Core/compulsory
	Physiology and pathology	Core/compulsory
Functional anatomy of the locomotor and nervous system	Human morphology	Core/compulsory
	Physics and statistics	Core/compulsory
Physiology and pathology	Human morphology	Core/compulsory
	Physics and statistics	Core/compulsory
