EXPERIENCE OF STUDY ABROAD AS PART OF THE TRAINING PROGRAM

The University of Milan supports the international mobility of its students, offering them the opportunity to spend periods of study and training abroad, a unique opportunity to enrich their curriculum in an international context. To this end, the University adheres to the European Erasmus+ program within which agreements with over 300 universities in over 30 countries have been signed. Under this program, students can attend one of these universities in order to pursue training in substitution of part of the curriculum foreseen by the chosen study course, including internships at companies, research and training centers or other organizations, or even to prepare their thesis. The University also maintains relationships with several other prestigious foreign institutions offering similar opportunities even within higher study levels.

Study and internships abroad

The University of Milan - Professional Education degree course has developed a great interest in the internationalization. The research of famous European universities which could fully match those of Italian courses and activities has currently allowed a bilateral agreement with the University La Salle (Madrid) where Erasmus Plus Program plans for and allows students all the usual assignment of an university course such as lectures, examinations and clinical clerkship. Students in a different clinical context may be also favored to process their thesis.

Erasmus program was created in 1987 precisely to ensure that European students could perform the same clerkships and educational activities in another European university aiming to develop the scientific and relational capabilities of its students inside cultural and teaching contests different from the Italian one.

Erasmus Plus program is now provided for our students which are attending their third year of the course by offering a six months training period supported by a grant.

Training activities included during the learning period spent abroad must be approved by the scientific coordinators of two teaching centers and the President of the degree course.

All these activities, arranged with the guest university by a Learning Agreement, are consistent with the Italian syllabus of the Professional Education courses. Students may be supported by Erasmus Coordinator in identifying foreign lectures and scientific assignments which could match those of the Italian course to warrant the achievement of the CFU required by the Italian curriculum.

For the final evaluation of the clerkships and exams' grades achieved attending European universities the University of Milan-Professional Education Course adopts the European Credit Transfer System (ECTS) and the conversion in thirties grades shared by the three Medicine and Surgery lines of the University of Milan. Under this regulation 30 ECTS (CFU) are

acknowledged for a six (6) months period abroad. Grades and clerkships will be validated and added to the student's Italian curriculum.

How to participate in Erasmus mobility programs

To gain access to mobility programs for study purposes, lasting 3-12 months, the enrolled students of the University of Milan must attend a public selection that starts usually around the month of February each year through the presentation of specific competition announcements, which contain information on available destinations, respective duration of the mobility, requirements and deadlines for submitting the online application. The selection, aimed at evaluating the proposed study abroad program of the candidate, knowledge of a foreign language, especially when this is a preferential requirement, and the motivations behind the request, is performed by specially constituted commissions. Each year, before the expiry of the competition announcements, the University organises information sessions for the specific study course or groups of study courses, in order to illustrate to students the opportunities and participation rules. To finance stays abroad under the Erasmus + program, the European Union assigns to the selected students a scholarship that - while not covering the full cost of living abroad - is a useful contribution for additional costs as travel costs or greater cost of living in the country of destination. The monthly amount of the communitarian scholarship is established annually at national level; additional contributions may be provided to students with disabilities.

In order to enable students in economic disadvantaged conditions to participate in Erasmus+ program, the University of Milan assigns further additional contributions; amount of this contributions and criteria for assigning them are established from year to year. The University of Milan promotes the linguistic preparation of students selected for mobility programs, organising every year intensive courses in the following languages: English, French, German and Spanish.

The University in order to facilitate the organisation of the stay abroad and to guide students in choosing their destination offers a specific support service.
