CHARACTERISTICS OF DEGREE PROGRAMME

General and specific learning objectives

The Master's degree programme in Nursing and Midwifery Sciences aims to provide the graduate with an education which allows them to:

- assess and critically evaluate the evolving needs of patients entrusted to their professional care, including gender-based needs, if and when needed;
- use research methods and tools in clinical practice and treatment, organisation, and training;
- apply and assess the impact of different theoretical models on treatment operations;

- critically analyse the ethical aspects of clinical care, as well as multi-professional and multi-cultural issues;
- design, generate, and assess education and training efforts;
- develop teaching skills in terms of tutoring operations, and internship coordination for first-level, complementary, and continuing education;
- design and intervene in operations regarding complex treatment and organisational issues;
- plan, manage, and assess treatment services with a view toward improving quality (planning, organisation, management, control);
- supervise treatment falling within the scope of one's professional duties, and provide professional consultancy.

Professional profile and employment opportunities

Role in the workforce:

Graduates of the Master's degree programme in Nursing and Midwifery Sciences have high-level competencies in procedures regarding treatment, management, training, and research in any of the fields relating to the different healthcare professions included in this academic class.

Employment opportunities:

Employment opportunities for those earning a Master's Degree programme in Nursing and Midwifery Science include:

- executive roles in healthcare management;
- coordinating Departments or clinics;
- university teaching, taking part in all competitive-selection procedures as required;
- continuing education;
- research through a public or private institution.

EXPERIENCE OF STUDY ABROAD AS PART OF THE TRAINING PROGRAM

The University of Milan supports international mobility by providing its students with the opportunity to spend study and internship periods abroad. It is a unique chance to enrich your educational path in a new exciting environment.

The agreements entered into by the University with over 300 universities from the 27 EU member countries and other Extra-EU countries under the European Erasmus+ programme allow regularly enrolled students to carry out part of their studies at one of the partner universities or to undertake internships at companies, training and research centres and other organizations.

Similar international mobility opportunities are provided outside Europe, through agreements with a number of prestigious institutions.

How to participate in Erasmus mobility programs

The students of the University of Milan can participate in mobility programmes, through a public selection procedure.

Ad hoc commissions will evaluate:

- · Academic career
- the candidate's proposed study programme abroad
- his/her foreign language proficiency
- the reasons behind his/her application

Call for applications and informative meetings

The public selection generally begins around February each year with the publication of a call for applications specifying the destinations, with the respective programme duration (from 2/3 to 12 months), requirements and online application deadline.

Every year, before the deadline for the call, the University organizes informative meetings to illustrate opportunities and rules for participation to students.

Erasmus+ scholarship

The European Union grants the winners of the Erasmus+ programme selection a scholarship to contribute to their mobility costs, which is supplemented by the University funding for disadvantaged students.

Language courses

Students who pass the selections for mobility programmes can benefit from intensive foreign language courses offered each year by the University.
