CHARACTERISTICS OF DEGREE PROGRAMME

General and specific learning objectives

The goal of the Master's degree programme in Health Professions of Prevention Sciences is to provide training which allows to make decisions regarding the organisation and management of healthcare services provided by staff with technical functions within the field of medicine.

The graduate will be able to command and exercise professional skills and methods in research, training, and management.

Specific educational goals include:

- Employ specific scientific knowledge in relation to their professional role in order to make decisions concerning the organisation and management of health services supplied by professional healthcare personnel in the medical field within health facilities, including preventative and protection healthcare services and the Local Health Authorities;
- Utilise skills in healthcare management and organisation in order to coordinate healthcare services, and to manage available human and technological resources, evaluating the cost/benefit ratio;
- Monitor specific sectors of the health organisation within the sphere of preventative healthcare;
- Use research methods and tools in the organisation of clinical services;
- Optimise the use of all resources (human, technological, IT, financial resources) available to preventative healthcare facilities;
- Design and conduct training programmes for continuing education and refresher courses at one's own clinic or facility;
- Develop teaching skills for teaching aspiring professionals in one's field through tutorials, and internship coordination for first-tier, complementary, and continuing education.

Professional profile and employment opportunities

The employment opportunities for those earning a degree in Health Professions of Prevention Sciences are as follows:

- executive positions in clinics tasked with preventative services (organisation/supervision of the facilities, and effective service provision);
- university teaching: graduates may undertake a university-teaching career once they have passed all competitive-procedures required by the law;
- university research within one's professional field;
- preventative services with organisational and management activities within the public and private sector;
- preventative services with advanced professional activities within the public and private sector;
- training activities, including assessing needs, design, and instruction within a public or private clinic.

MASTER PROGRAMMES ADMISSION

Admittance from three-year degree courses at the University of Milan

D42-Health assistance

D43-Methods of prevention in the environment

D82-Health Assistance (Classe L/SNT4)

D83-Environment and Workplace Prevention Techniques (Classe L/SNT4)

EXPERIENCE OF STUDY ABROAD AS PART OF THE TRAINING PROGRAM

The University of Milan supports international mobility by providing its students with the opportunity to spend study and internship periods abroad. It is a unique chance to enrich your educational path in a new exciting environment

The agreements entered into by the University with over 300 universities from 30 different countries under the European Erasmus+ programme allow regularly enrolled students to carry out part of their studies at one of the partner universities or to undertake internships at companies, training and research centres and other organizations.

Similar international mobility opportunities are provided outside Europe, through agreements with a number of prestigious institutions.

How to participate in Erasmus mobility programs

The students of the University of Milan can participate in mobility programmes, which last 3 to 12 months, through a public selection procedure.

Ad hoc commissions will evaluate:

- the candidate's proposed study programme abroad;
- his/her foreign language proficiency;
- the reasons behind his/her application.

Call for applications and informative meetings:

The public selection generally begins around February each year with the publication of a call for applications specifying the destinations, with the respective programme duration, requirements and online application deadline.

Every year, before the deadline for the call, the University organizes informative meetings to illustrate opportunities and rules for participation to students.

Erasmus+ scholarship:

The European Union grants the winners of the Erasmus+ programme selection a scholarship to contribute to their mobility costs, which is supplemented by the University funding for disadvantaged students.

Language courses:

Students who pass the selections for mobility programmes can benefit from intensive foreign language courses offered each year by the University.
