

**UNIVERSITA' DEGLI STUDI DI MILANO**  
**PROGRAMME DESCRIPTION - ACADEMIC YEAR 2021/22**  
**MASTER DEGREE**  
**Pharmaceutical Biotechnology (Classe LM-9)**  
**enrolled from 2014/15 academic year**

### HEADING

<b>Degree classification - Denomination and code:</b>	LM-9 Pharmaceutical, veterinary and medical biotechnologies
<b>Degree title:</b>	Dottore Magistrale
<b>Curricula currently available:</b>	Biotechnologies in drug's research and development / Development and production of biotechnological drugs / PHARMACOGENOMICS AND PRECISION THERAPEUTICS
<b>Length of course:</b>	2 years
<b>Credits required for admission:</b>	180
<b>Total number of credits required to complete programme:</b>	120
<b>Years of course currently available:</b>	1st , 2nd
<b>Access procedures:</b>	Open, subject to completion of self-assessment test prior to enrolment
<b>Course code:</b>	E51

### PERSONS/ROLES

#### Head of Interdepartmental Study Programme

Prof. Maurizio Crestani

#### Tutors - Faculty

Tutor per l'orientamento

prof.ssa Anna Cariboni [anna.cariboni@unimi.it](mailto:anna.cariboni@unimi.it)

prof.ssa Paola Conti [paola.conti@unimi.it](mailto:paola.conti@unimi.it)

prof. Ivano Eberini [ivano.eberini@unimi.it](mailto:ivano.eberini@unimi.it)

Tutor per stage e tirocini

prof.ssa Laura Calabresi [laura.calabresi@unimi.it](mailto:laura.calabresi@unimi.it)

Tutor per la mobilità internazionale e l'Erasmus

prof.ssa Anna Cariboni [anna.cariboni@unimi.it](mailto:anna.cariboni@unimi.it)

Tutor per studenti disabili DSA

prof.ssa Emma De Fabiani [emma.defabiani@unimi.it](mailto:emma.defabiani@unimi.it)

### CHARACTERISTICS OF DEGREE PROGRAMME

#### General and specific learning objectives

The aim of the master course in Pharmaceutical Biotechnology is to provide knowledge in scientific methodologies for the design, production and characterization of biotechnological drugs. The master course is organized in three programs, two held in Italian and one in English. The first two programs share a common first year, dedicated to the acquisition of basic knowledge, followed by specific pathways oriented (1) to the use of the biotechnologies in identifying new targets and designing new drugs ("Biotecnologie nella ricerca e sviluppo del farmaco") and (2) to the development, production, formulation, and evaluation of biotechnological drugs ("Biotecnologie nella ricerca e sviluppo del farmaco"). The third program, "Pharmacogenomics and Precision Therapeutics", held in English, is more focused to the recent innovative biotechnological drugs, such as cell and gene therapies.

#### Expected learning outcomes

The Master Course in Pharmaceutical Biotechnology provides deep knowledge in the field of biotechnologies applied to the development of new drugs. The graduates will acquire specific expertise in the areas of: biochemistry, biology, physiology,

pathology, cell and molecular biotechnologies, pharmacology, legislation, and pharmaceutical chemistry. The ambition of the Master Course is to provide the students with a multidisciplinary background sufficient to approach the various phases of drug development, from research, production and formulation, to pre-clinical and clinical development and approval.

The graduates will acquire:

- ability to apply the knowledge to the identification of new targets and development of novel drugs;
- ability to face innovative drugs, such as gene and cell therapies;
- ability to apply current methodologies to generate novel protocols, with a problem-solving approach, being able to integrate knowledge obtained during the first level degree with those acquired during the master course.

### **Professional profile and employment opportunities**

The occupational possibilities for the graduates are:

- teaching and research activity in public and private Universities;
- research activity in public research institutes;
- research and development in pharma and biotech companies;
- teaching in secondary schools;
- clinical monitoring.

In addition, graduates will be able to participate in the creation and management of biotech companies in the field of pharmaceutical and diagnostic products.

## **EXPERIENCE OF STUDY ABROAD AS PART OF THE TRAINING PROGRAM**

The University of Milan supports international mobility by providing its students with the opportunity to spend study and internship periods abroad. It is a unique chance to enrich your educational path in a new exciting environment.

The agreements entered into by the University with over 300 universities from the 27 EU member countries and other Extra-EU countries under the European Erasmus+ programme allow regularly enrolled students to carry out part of their studies at one of the partner universities or to undertake internships at companies, training and research centres and other organizations.

Similar international mobility opportunities are provided outside Europe, through agreements with a number of prestigious institutions.

### **Study and internships abroad**

To increase internationalization, students will be informed on the Erasmus and Erasmus Mundus programs activated within the master course. Lectures of foreign teachers and stages in foreign laboratories will be also proposed. Some of the classes will be given in English to give the students the opportunity to improve the English knowledge, with specific focus on scientific terminology.

More info is available at the link:

<https://www.unimi.it/it/internazionale/studiare-allestero>

<https://www.unimi.it/it/internazionale/studiare-allestero/partire-con-erasmus/come-partecipare/erasmus-aree/erasmus-scienze-del-farmaco>

Procedure for the recognition of study periods abroad: each student must propose a Learning Agreement regarding training activities that lead to the recognition of a number of credits adequate to the period spent abroad. Specifically, 20 CFU for a three-month period; 30 CFU for a six-month period; 45 CFU for a nine-month period.

Evaluation of the period spent abroad: the period of study abroad will be recognized as valid after obtaining at least 70% of the credits specified in the learning agreement, while the activity of the thesis or internship will be valid only after acquisition of all credits.

Incentives: for students who have accomplished satisfactorily the training program, additional points are added to the final degree mark. Up to a maximum of 3 points can be added depending on the duration of the study period, the amount of credits attained, and the overall results obtained by the student.

### **How to participate in Erasmus mobility programs**

The students of the University of Milan can participate in mobility programmes, through a public selection procedure. Ad hoc commissions will evaluate:

- Academic career
- the candidate's proposed study programme abroad
- his/her foreign language proficiency
- the reasons behind his/her application

Call for applications and informative meetings

The public selection generally begins around February each year with the publication of a call for applications specifying the destinations, with the respective programme duration (from 2/3 to 12 months), requirements and online application deadline.

Every year, before the deadline for the call, the University organizes informative meetings to illustrate opportunities and rules for participation to students.

Erasmus+ scholarship

The European Union grants the winners of the Erasmus+ programme selection a scholarship to contribute to their mobility

costs, which is supplemented by the University funding for disadvantaged students.

#### Language courses

Students who pass the selections for mobility programmes can benefit from intensive foreign language courses offered each year by the University.

## ACTIVE CURRICULA LIST

Biotechnologies in drug's research and development Course years currently available: 1st , 2nd

Development and production of biotechnological drugs Course years currently available: 1st , 2nd

PHARMACOGENOMICS AND PRECISION THERAPEUTICS Course years currently available: 1st , 2nd

### Procedure for choosing a curriculum

The choice among the three offered curricula must be done at admission. It is possible to change the curriculum only between the two held in Italian, and only before the end of the first semester.

## CURRICULUM: [E51-C] Biotechnologies in drug's research and development

### Qualifying Training Objectives

XXXXXXXXXXXXXXXXXXXX

### Skills acquired

XXXXXXXXXXXXXXXXXXXX

### Professional profile and employment possibilities

XXXXXXXXXXXXXXXXXXXX

### Notes

## 1st COURSE YEAR Core/compulsory courses/activities Curriculum-specific features Biotechnologies in drug's research and development

Learning activity	Ects	Sector
Biology of development and differentiation	6	BIO/13
Biotechnology in Pharmacology	8	BIO/14
Metabolic and Functional Biochemistry	6	BIO/10
Molecular basis of hormone and drug action	8	(8) MED/13, (8) BIO/14
MOLECULAR VIROLOGY	6	(6) BIO/19, (6) MED/07
Pathophysiology	6	MED/04
Physiology of Integrated systems	6	BIO/09
Purification and formulation of biotechnological drug products	8	(8) CHIM/09, (8) CHIM/08
Structural Bioinformatics and Molecular Modeling	10	(10) BIO/10, (10) CHIM/06, (10) CHIM/08
Total compulsory credits		64

## 2nd COURSE YEAR Core/compulsory courses/activities Curriculum-specific features Biotechnologies in drug's research and development

Learning activity	Ects	Sector
Advanced course in Biotechnology and Pharmacology	7	BIO/14
Innovative biotechnological drugs	9	(3) CHIM/06, (6) BIO/14, (6) CHIM/08
Total compulsory credits		16

## Further elective courses Curriculum-specific features Biotechnologies in drug's research and development

Experimental laboratory of Biotechnology	9	ND
--	---	----

<b>End of course requirements Curriculum-specific features Biotechnologies in drug's research and development</b>		
FINAL EXAM	21	ND
Lab training	10	ND
Total compulsory credits	31
