

UNIVERSITA' DEGLI STUDI DI MILANO
PROGRAMME DESCRIPTION - ACADEMIC YEAR 2021/22
BACHELOR
ENVIRONMENTAL SCIENCE AND POLICY - (Classe L-32)
enrolled from 2018-19 a.y.

HEADING

Degree classification - Denomination and code:	L-32 Environmental sciences
Degree title:	Dottore
Curricula currently available:	Environmental Management and Sustainability / Environmental Sciences and Technologies
Length of course:	3 years
Total number of credits required to complete programme:	180
Years of course currently available:	1st , 2nd , 3rd
Access procedures:	Cap on student, student selection based on entrance test
Course code:	F2A

PERSONS/ROLES

Head of Study Programme

Prof.ssa Stefanella Stranieri

Tutors - Faculty

Tutor per l'orientamento: prof.ssa Stella Agostini, prof.ssa Caterina La Porta;
Tutor per la mobilità internazionale e l'Erasmus: prof.ssa Michela Sugni, dott. Luigi Orsi;
Tutor piani di studio: prof.ssa Alessia Cavaliere, prof. Maurizio Maugeri, prof. Marco Parolini, prof. Stefano Trasatti;
Tutor per stage e tirocini: prof. Danilo Bertoni
Tutor per laboratori e altre attività: prof. Diego Rubolini;
Tutor per trasferimenti e riconoscimento crediti: prof.ssa Marcella Guarino, prof. Giangiacomo Beretta, prof.ssa Alessia Cavaliere;
Tutor per studenti con disabilità: prof. Giangiacomo Beretta

CHARACTERISTICS OF DEGREE PROGRAMME

General and specific learning objectives

The course aims to achieve the following objectives:

- the transmission to students of a systemic culture related to the natural and human environment;
- the training of graduates able to use the good practices of scientific methods and have adequate theoretical knowledge and operational skills to analyze, interpret and explain environmental phenomena and processes, and to face and solve complex problems that arise in this area;
- the preparation of graduates able to read environmental issues on several levels, using a multidisciplinary and interdisciplinary approach;
- the training of graduates able to operate autonomously, to work in a group and to manage operational situations into the workplace;
- the preparation of graduates able to use at least one European Union language in addition to Italian, in relation to the specific context of reference;
- the provision of cognitive tools that allow graduates to immediately understand the work and professional contexts or to continue their studies in master's programs (first level) or master's degree courses.

Expected learning outcomes

In the first two years of the course, the student is expected to acquire knowledge and skills relating to the foundations of formal and quantitative disciplines (mathematics, statistics and computer science), as well as of "hard sciences" (chemistry, physics, earth sciences). In the first two years the student will also acquire in-depth knowledge and skills in the "life sciences" (biology, ecology, agronomy) and in the economic-legal-social disciplines (political economy, management, law), with particular reference to environmental issues. In the third year, the student will have to further deepen his knowledge and enhance his skills and abilities, also from an operational point of view, in the natural sciences and in the sciences of society, selecting the path that, among those proposed by the Degree Course, fits with the cultural vocation and professional aspirations of the student.

Professional profile and employment opportunities

On the basis of the knowledge, skills and abilities acquired, the graduates of the degree course in Environmental Sciences and Policies will be able to confidently aspire to qualified jobs in companies and private organizations, active - both in the regional context, as well as in the national or international context - in all branches and in all sectors of industry and services for which the relationship with environmental problems in their multiple forms is fundamental (from the energy industry to the agro-food industry, from the green economy to consultancy services companies, companies in the preparation of environmental and social budgets, from companies that provide environmental impact forecasts to those that provide landscape and territorial planning services). They will also be able to reasonably aspire to qualified jobs in the public administration bodies, whose involvement in the control and management of environmental problems and in the implementation of interventions and regulatory policies in this area, again at all levels (local, regional, national and supranational), is becoming more and more pressing and pervasive and requires more and more evident the presence of experts who combine solid knowledge and skills in the natural sciences with robust knowledge and operational skills in the economic and legal field.

Initial knowledge required

Requirements and knowledge required for access

- high school diploma or equivalent foreign qualification pursuant to D.M. 270 of 22 October 2004.

Methods for verifying knowledge and personal preparation

- admission test

The admission provides a test for access "TOLC" (CISIA On Line Test).

In the first year are available 100 places.

The TOLC can be taken at the University of Milan or any other university belonging to the CISIA (Interuniversity Integrated Systems for Access Consortium). Registrations to the TOLC must be made on the CISIA website (<https://www.cisiaonline.it>).

- exam topics

The TOLC valid for the enrollment in the Bachelor of Science in Environmental Sciences and Policies is the TOLC-S, which comprehends the following sections: basic mathematics (20 questions-50 minutes), reasoning and problems (10 questions-20 minutes), comprehension of the text (10 questions-20 minutes), basic sciences (10 questions-20 minutes).

Each question has 5 possible answers. Only one of these is correct. In the TOLC-S there is an additional section related to the evaluation of the English language, which consists of 30 questions to be completed in 15 minutes. The result of this part does not contribute to the score of the test.

The final score of the test is the result of the following rules:

+1 for each correct answer, -0.25 for each wrong answer, 0 for each answer not given.

+1 for each correct answer, 0 for each wrong or not given answer in the English section.

The winners will be able to enroll within the deadlines indicated in the announcements of admission.

- consult the admission notice and the following link: <https://spa.cdl.unimi.it/it/iscriversi>

Additional educational obligations and methods for recovery

Students who have not reached a score greater than or equal to 10 in the Mathematics module will be assigned Additional Educational Obligations (OFA).

For students with OFA, support activities will be organized in the period October-December, and a final test.

In the absence of this evidence, the student will not be able to take any second year exams before having passed the Mathematics exam.

Information on the page <https://spa.cdl.unimi.it/it/studiare/le-matricole>

Access for transfer or for students who have already graduated

Students already enrolled in a degree course of the University of Milan, in another university or already graduates, can be exempted from the test only if they meet the necessary requirements to be admitted to second year, at least 30 credits, of which 9 can be validated for the Mathematics exam.

For more details on the procedure, please refer to the announcement.

Students admitted to the first year must take the test and register for the call

Compulsory attendance

Attendance is not compulsory, however attendance at didactic activities with laboratories, field activities, internships, etc. is

strongly recommended.

Degree programme final exams

The final exam consists in the presentation of a theoretical, empirical or experimental paper, or in the presentation of a report related to an internship. This paper or report plays a formative role that completes the individual three-year course of study. The paper or report can also be written in English.

To be admitted to the final exam, the student must have earned 174 credits, including the credits required for knowledge of the foreign language. In particular, they must acquire at least 42 CFU in basic training activities, at least 66 CFU in characterizing training activities, at least 18 CFU in similar or supplementary training activities. They will also have to acquire 18 CFU in freely chosen training activities, 3 CFU related to the verification of knowledge of the foreign language (English), 9 CFU for laboratory activities or field activities or internal or external internship.

Campus

The classrooms are located in Milan, Città Studi, mainly in via Celoria 20

Notes

In order to sit the English-language exam required by the study plan, students must be proficient in English at a B1 level under the Common European Framework of Reference for Languages (CEFR). This proficiency level may be certified as follows:

- By a language certification, earned within three years prior to the date of submission, at a B1 level or higher. For the list of language certifications recognised by the University, please review: <https://www.unimi.it/it/studiare/competenze-linguistiche/placement-test-test-di-ingresso-e-corsi-di-inglese>. The certification must be uploaded during the enrolment procedure, or subsequently to the portal <http://studente.unimi.it/uploadCertificazioniLingue>;

- By a Placement Test, which is delivered by the University Language Centre (SLAM) during year I only, from October to December. Students who fail the test will be required to take a SLAM course.

The Placement Test is mandatory for all students who do not hold a valid certification.

Those who do not sit the Placement Test by December, or who fail to pass the end-of-course test within six attempts, must obtain an outside paid certification by the programme year contemplated for their exam in English.

EXPERIENCE OF STUDY ABROAD AS PART OF THE TRAINING PROGRAM

The University of Milan supports international mobility by providing its students with the opportunity to spend study and internship periods abroad. It is a unique chance to enrich your educational path in a new exciting environment.

The agreements entered into by the University with over 300 universities from the 27 EU member countries and other Extra-EU countries under the European Erasmus+ programme allow regularly enrolled students to carry out part of their studies at one of the partner universities or to undertake internships at companies, training and research centres and other organizations.

Similar international mobility opportunities are provided outside Europe, through agreements with a number of prestigious institutions.

Study and internships abroad

About ERASMUS + program, for students enrolled in the degree course in Environmental Sciences and Policies, agreements with international universities specializing in teaching and research on environmental issues have been signed. The study period abroad can be used to take courses and take the related exams, as well as to carry out research activities for the thesis.

For further information write to sepa@unimi.it.

How to participate in Erasmus mobility programs

How to participate in Erasmus+ mobility programmes

The students of the University of Milan can participate in mobility programmes, through a public selection procedure.

Ad hoc commissions will evaluate:

- Academic career
- the candidate's proposed study programme abroad
- his/her foreign language proficiency
- the reasons behind his/her application

Call for applications and informative meetings

The public selection generally begins around February each year with the publication of a call for applications specifying the destinations, with the respective programme duration (from 2/3 to 12 months), requirements and online application deadline.

Every year, before the deadline for the call, the University organizes informative meetings to illustrate opportunities and rules for participation to students.

Erasmus+ scholarship

The European Union grants the winners of the Erasmus+ programme selection a scholarship to contribute to their mobility costs, which is supplemented by the University funding for disadvantaged students.

Language courses

Students who pass the selections for mobility programmes can benefit from intensive foreign language courses offered each year by the University.

Student Desk booking through InformaStudenti

1st COURSE YEAR Core/compulsory courses/activities common to all curricula		
Learning activity	Ects	Sector
Administrative and environmental law	6	IUS/10
English assessment B1 (3 ECTS)	3	ND
Foundations of biology	9	BIO/06
Foundations of inorganic and organic chemistry	9	CHIM/03, CHIM/06
Fundamentals of Earth sciences	9	GEO/02
Mathematics	9	MAT/09, MAT/01, MAT/02, MAT/03, MAT/04, MAT/05, MAT/06, MAT/07, MAT/08
Physics	6	FIS/08, FIS/07, FIS/06, FIS/05, FIS/04, FIS/03, FIS/02, FIS/01
Probability, statistics and computer science	9	INF/01, MAT/06
Total compulsory credits		60
2nd COURSE YEAR Core/compulsory courses/activities common to all curricula		
Learning activity	Ects	Sector
Botany	9	BIO/02, BIO/01
Ecology	9	BIO/07
Environmental and landscape geology	9	GEO/05
Environmental biochemistry and microbiology	6	BIO/10, BIO/19
Environmental economics	6	SECS-P/01
Microeconomics	9	SECS-P/01
Zoology	9	BIO/05
Total compulsory credits		57
3rd COURSE YEAR Core/compulsory courses/activities common to all curricula		
Learning activity	Ects	Sector
Environmental management	6	SECS-P/08
Natural resources and public goods economics and policy	6	AGR/01
Total compulsory credits		12
Further elective courses common to all curricula		
The student will have to acquire 18 credits among all the offered training activities and all the courses activated by the University, after evaluation by the tutor. The courses not already chosen among the curricula can be selected.		
During the second or preferably the third year of the course, students will have to acquire 9 CFU through Laboratories and / or Internships and / or field activities.		
The laboratory activated for the academic year 2021/2022 is the interdisciplinary "Laboratory of Environmental Science and Policy" (9 cfu).		
Internships and / or field activities eventually activated will be published on the website of the degree course https://spa.cdl.unimi.it/it.		
The student must choose one of the two curricula: Curriculum A - Environmental Management and Sustainability; or Curriculum B - Environmental Sciences and Technologies. Then the student will have to choose 3 courses among those provided for the chosen Curriculum.		

End of course requirements common to all curricula			
Final exam		6	NA
	Total compulsory credits	6	

ACTIVE CURRICULA LIST

Environmental Management and Sustainability Course years currently available: 1°, 2°, 3°

Environmental Sciences and Technologies Course years currently available: 1°, 2°, 3°

Procedure for choosing a curriculum

In the second year the student presents the study plan, which provides for the choice of one of the two curricula: "Environmental management and sustainability policies" or "Sciences and technologies for the environment and its protection", with the specification of three courses among those listed in the Study Manifesto as characterizing the chosen curriculum, as well as the indication of courses and others educational activities a choice of the student for a total of 18 ECTS. This last choice can be made in complete freedom within the overall educational offer of the University, provided that the chosen courses and training activities are consistent with the training project presented by the student with his / her own pine of studies. The courses not already chosen, among those characterizing the selected curriculum, as well as all the courses characterizing the unselected curriculum are naturally available for the free choices of the students. For date and modalities for compulsory presentation of the study plan <https://www.unimi.it/en/node/122/>

The presentation or variation of the piano of studies in periods other than that specified or by non-enrolled students, all academic in question, is not allowed. The verification of the correspondence between the last approved study plan and the exams taken is a necessary condition for admission to the same degree. If, upon submission of the graduation application, the student's career does not comply with the approved study plan, the student cannot be admitted to the graduation exam.

CURRICULUM: [F2A-A] Environmental Management and Sustainability

Qualifying Training Objectives

The aim of the curriculum "Environmental management and sustainability policies" is to deepen topics from the economic, legal and social sciences with reference to environmental issues.

Further elective courses Curriculum-specific features Environmental Management and Sustainability		
Choose 3 of the following courses:		
Administrative law of sustainable development	6	IUS/10
Agri-food policy and environmental sustainability	6	AGR/01
Climate change economics and policy	6	SECS-P/01
Environmental accounting and management	6	SECS-P/08, SECS-P/07
Environmental planning and land policy	6	ICAR/20
Environmental sustainability of intensive breeding	6	AGR/10
Globalization and environmental policy	6	AGR/01
Sustainability of food production	6	AGR/15
Sustainable innovation of animal nutrition	6	AGR/18

CURRICULUM: [F2A-B] Environmental Sciences and Technologies

Qualifying Training Objectives

The aim of the curriculum "Sciences and technologies for the environment and its protection" is to deepen the topics of the natural sciences and biological sciences with reference to environmental problems.

Further elective courses Curriculum-specific features Environmental Sciences and Technologies		
Choose 3 of the following courses:		
Applied ecology	6	BIO/07
Biodiversity management and conservation	6	BIO/05
Climatology	6	GEO/04
Environmental Chemistry	6	CHIM/12
Environmental Genetics	6	BIO/18
Environmental toxicology	6	BIO/14
Evolutionary biology and phylogeny	6	BIO/05
Foundations of ecotoxicology	6	BIO/07
Foundations of physics for environmental sciences	6	FIS/07, FIS/06
Human health and environmental risk	6	MED/04
