

UNIVERSITA' DEGLI STUDI DI MILANO
PROGRAMME DESCRIPTION - ACADEMIC YEAR 2017/18
BACHELOR
Industrial Chemistry (Class L-27)
Enrolled from the academic year 2009-2010

HEADING

Degree classification - Denomination and code:	L-27 Chemistry
Degree title:	Dottore
Length of course:	3 years
Total number of credits required to complete programme:	180
Years of course currently available:	1st , 2nd , 3rd
Access procedures:	Cap on student, student selection based on entrance test
Course code:	F6X

PERSONS/ROLES

Head of Study Programme

Prof.ssa Laura Maria Raimondi

Degree Course Coordinator

Prof.ssa Laura Prati

Tutors - Faculty

Prof. Domenico Albanese, prof.ssa Elena Cariati, Dott. Gian Luca Chiarello

CHARACTERISTICS OF DEGREE PROGRAMME

General and specific learning objectives

General aims and objectives of the course are the followings:

- To develop in our graduates the qualities needed to become the next generation of high quality chemists operating in chemical research, chemical industry and in the teaching of chemistry
- To make our students realize that chemistry is a fundamental discipline, central to the development of a modern and concerned society
- To provide intellectual stimuli and practical skills for highly determined graduates willing to play leading roles and undertake brilliant careers in the society

In particular, graduates in Industrial Chemistry are expected to gain the following skills:

- The basic knowledge in mathematics and physics to deal with chemical principles and concepts on a scientific basis.
- The ability to understand the practical implications of a wide range of chemical phenomena and to deal with them at the applied level.
- The ability to understand the various aspects of chemical production and its impact on the society.
- The creativity to develop new practical solutions to chemical production-related problems, with particular emphasis on sustainable development and economic benefits.
- The open-minded attitude necessary to collaborate with scientists of culturally-related disciplines.

Professional profile and employment opportunities

The students with the degree in Industrial Chemistry would be entitled to work in public and private-owned laboratories as highly qualified technicians. They could operate as assistants of more specialized personnel in the development of new products and/or new materials, collaborate in the design and realization of novel protocols for industrial preparations. They are trained for working on a chemical plant, take care of the validation and control of an established process and in the

management of logistics issues, with a special attention devoted to the safety of plants, processes and chemicals. They could find positions in chemical industry, for example oil companies, polymer and material industries, and in public agency. They can also apply for Master programmes, preferentially in Industrial Chemistry and Management. On average, ca. 70% of our students do so, after receiving the degree in Industrial Chemistry.

EXPERIENCE OF STUDY ABROAD AS PART OF THE TRAINING PROGRAM

The University of Milan supports the international mobility of its students, offering them the opportunity to spend periods of study and training abroad, a unique opportunity to enrich their curriculum in an international context.

How to participate in Erasmus mobility programs

To gain access to mobility programs for study purposes, lasting 3-12 months, the enrolled students of the University of Milan must attend a public selection that starts usually around the month of February each year through the presentation of specific competition announcements, which contain information on available destinations, respective duration of the mobility, requirements and deadlines for submitting the online application.

The selection, aimed at evaluating the proposed study abroad program of the candidate, knowledge of a foreign language, especially when this is a preferential requirement, and the motivations behind the request, is performed by specially constituted commissions.

Each year, before the expiry of the competition announcements, the University organises information sessions for the specific study course or groups of study courses, in order to illustrate to students the opportunities and participation rules.

To finance stays abroad under the Erasmus + program, the European Union assigns to the selected students a scholarship that - while not covering the full cost of living abroad - is a useful contribution for additional costs as travel costs or greater cost of living in the country of destination.

The monthly amount of the communitarian scholarship is established annually at national level; additional contributions may be provided to students with disabilities.

In order to enable students in economic disadvantaged conditions to participate in Erasmus+ program, the University of Milan assigns further additional contributions; amount of this contributions and criteria for assigning them are established from year to year.

The University of Milan promotes the linguistic preparation of students selected for mobility programs, organising every year intensive courses in the following languages: English, French, German and Spanish.

The University in order to facilitate the organisation of the stay abroad and to guide students in choosing their destination offers a specific support service.

More information in Italian are available on www.unimi.it > Studenti > Studiare all'estero > Erasmus+

Desk opening hour: Monday-friday 9 - 12

1st COURSE YEAR Core/compulsory courses/activities common				
Distribution	Learning activity	Teaching units/modules	Ects	Sector
<i>annuale</i>	Fisica generale		9	FIS/08, FIS/07, FIS/06, FIS/05, FIS/04, FIS/03, FIS/02, FIS/01
<i>1 semestre</i>	Istituzioni di matematica		9	MAT/09, MAT/01, MAT/02, MAT/03, MAT/04, MAT/05, MAT/06,

				MAT/07, MAT/08
1 semestre	Chimica generale e inorganica/Laboratorio di chimica generale e inorganica (tot. credits: 12)	Module: General and inorganic chemistry	6	CHIM/03
		Module: Laboratory of general and inorganic chemistry	6	CHIM/03
2 semestre	Chimica analitica I/Laboratorio di chimica analitica I (tot. credits: 12)	Analytic chemistry	6	CHIM/01
		Laboratory of analytic chemistry	6	CHIM/01
2 semestre	Complementi di matematica e calcolo numerico		6	MAT/09, MAT/01, MAT/02, MAT/03, MAT/04, MAT/05, MAT/06, MAT/07, MAT/08
2 semestre	Prova di lingua inglese		3	L-LIN/12
2 semestre	Chimica organica I		7	CHIM/06
Total compulsory credits			58	

2nd COURSE YEAR Core/compulsory courses/activities common

Distribution	Learning activity	Teaching units/modules	Ects	Sector
annuale	Chimica inorganica/Laboratorio di chimica inorganica (tot. credits: 12)	Module: Inorganic chemistry	6	CHIM/03
		Module: Laboratory of inorganic chemistry	6	CHIM/03
annuale	Chimica organica II		7	CHIM/06
annuale	Laboratorio di chimica organica (tot. credits: 10)	Unit: Laboratory of organic chemistry 1	5	CHIM/06
		Unit: Laboratory of organic chemistry 2	5	CHIM/06
1 semestre	Chimica Analitica II / Laboratorio di Chimica Analitica II (tot. credits: 12)		6	CHIM/01
			6	CHIM/01
1 semestre	Chimica fisica I		6	CHIM/02
2 semestre	Laboratorio di chimica fisica		6	CHIM/02
2 semestre	Chimica fisica II		6	CHIM/02
Total compulsory credits			59	

3rd COURSE YEAR Core/compulsory courses/activities common

Distribution	Learning activity	Teaching units/modules	Ects	Sector
1 semestre	Chimica biologica		6	BIO/10
1 semestre	Chimica Industriale		6	CHIM/04
1 semestre	Chimica macromolecolare		6	CHIM/04
1 semestre	Chimica fisica industriale		6	CHIM/02
2 semestre	Impianti chimici con laboratorio (tot. credits: 12)	Module: Chemical plants	6	ING-IND/25
		Module: Lab chemical plants	6	ING-IND/25
2 semestre	Tirocinio		12	
Total compulsory credits			48	

Activities chosen by the student

Final learning activities

	Prova finale		3	
Total compulsory credits			3
