

UNIVERSITA' DEGLI STUDI DI MILANO PROGRAMME DESCRIPTION - ACADEMIC YEAR 2023/24 BACHELOR

Animal Production (Classe L-38) Enrolled from 2021/2022 accademic year

HEADING	
Degree classification - Denomination	L-38 Zoology
and code:	
Degree title:	Dottore
Curricula currently available:	Intensive farming / Extensive farming
Length of course:	3 years
Total number of credits required to	180
complete programme:	
Years of course currently available:	1st, 2nd, 3rd
Access procedures:	Cap on student, student selection based on entrance test
Course code:	H16

PERSONS/ROLES

Head of Study Programme

prof. Vittorio Maria Moretti

Tutors - Faculty

Tutor per l'orientamento: prof. Valerio Bronzo

Tutor per la mobilità internazionale e l'Erasmus: prof. Gabriele Brecchia

Tutor per i piani di studio: prof.ssa Lisa Vallone Tutor per stage e tirocini: prof.ssa Luisa Zaniboni

Tutor per laboratori e altre attività: prof.ssa Anna Lange Consiglio

Tutor per tesi di laurea: prof.ssa Alessia Giordano Tutor per trasferimenti: prof. Vittorio Maria Moretti

Tutor per riconoscimento crediti: prof. Vittorio Maria Moretti

Via dell'Università 6 Lodi La segreteria è aperta al pubblico previo appuntamento tramite il servizio informastudenti nei seguenti giorni: martedì dalle 13 alle 15 tramite piattaforma Teams - mercoledì dalle 9 alle 12 tramite piattaforma Teams - giovedì dalle 13 alle 15 in presenza. https://www.unimi.it/it/studiare/servizi-gli-studenti/segreterie-informastudenti

CHARACTERISTICS OF DEGREE PROGRAMME

General and specific learning objectives

The bachelor degree program in Animal Production contains theoretical knowledge and enables the acquisition of the necessary practical skills needed to work in animal farms as experts in animal breeding and genetics, nutrition, growth, behavior and management, with particular reference to the protection of animal welfare and the reduction of the environmental impact of farming activities.

The course provides knowledge and practical skills useful for the management of farms and livestock breeding. Graduates are able to assess the productive and functional attitudes of farmed animals, taking into account environmental, ethical and economic factors and in compliance with current legislation. Graduates manage the growth stages and are able to formulate feed for all food producing animals. They have also the skills to perform cost and profitability analysis of livestock farms and to address and manage aspects related to the processing of food of animal origin, hygiene and quality control.

Professional profile and employment opportunities

The graduate in Animal Production works as an employee and / or entrepreneur and / or consultant in:

- Animal farms;
- Genetic centers and breeders associations;
- Companies that produce apparatus, structures and equipment for animal husbandry;
- Food processing companies and food distribution system;
- Feed companies, dairy and meat industries, slaughterhouses;
- Companies providing services (genetic, nutritional, reproductive) to animal farms;
- Veterinary drug industry;

- PDO consortia and professional organizations;
- Public territorial bodies;
- Laboratories for the control of the quality and safety of animal feed and food of animal origin;
- National and international organizations.

Notes

In order to get their degree, students are required to certify their knowledge of the English language at the B1 level. This level can be certified in one of the following ways:

· By submitting their language certificate, taken no more than 3

years before its submittal and attesting a B1 o higher level (for the list of the language certificates which are accepted by the University of Milan, please refer to the website: http://www.unimi.it/studenti/100312.htm).

Students can submit their language certificate during the immatriculation procedure or send it to the Language Centre of the University of Milan

(SLAM) via the Infostudente service.

· By sitting the placement test run by SLAM, during the first year

exclusively, from September to December. Should they not pass the Placement Test, students will have to attend the English language course organized by SLAM. All students who do not have a valid language certificate must sit the Placement Test. Those students who do not sit the Placement test by December or do not pass the end of course test in one of the 6 attempts granted will have to get a language certificate outside the University of Milan within their degree.

EXPERIENCE OF STUDY ABROAD AS PART OF THE TRAINING PROGRAM

The University of Milan supports international mobility by providing its students with the opportunity to spend study and internship periods abroad. It is a unique chance to enrich your educational path in a new exciting environment.

The agreements entered into by the University with over 300 universities from the 27 EU member countries under the European Erasmus+ programme allow regularly enrolled students to carry out part of their studies at one of the partner universities or to undertake internships at companies, training and research centres and other organizations.

Similar international mobility opportunities are provided outside Europe, through agreements with a number of prestigious institutions.

How to participate in Erasmus mobility programs

How to participate in Erasmus+ mobility programmes

The students of the University of Milan can participate in mobility programmes, through a public selection procedure.

Ad hoc commissions will evaluate:

- · Academic career
- the candidate's proposed study programme abroad
- his/her foreign language proficiency
- the reasons behind his/her application

Call for applications and informative meetings

The public selection for Erasmus+ mobility for study generally begins around February each year with the publication of a call for applications specifying destinations and requirements. Regarding the Erasmus+ Mobility for Traineeship, the University of Milan usually publishes two calls a year enabling students to choose a destination defined by an interinstitutional agreement or to find a traineeship position on their own.

The University organizes informative meetings to illustrate mobility opportunities and rules for participation.

Erasmus+ scholarship

The European Union grants the winners of the Erasmus+ programme selection a scholarship to contribute to their mobility costs, which may be supplemented by the University funding for disadvantaged students.

Language courses

Students who pass the selections for mobility programmes can benefit from intensive foreign language courses offered each year by the University Language Centre (SLAM).

Procedure for choosing a curriculum

The choice of curriculum can be made by submitting the study plan within the deadlines indicated on the site: https://spa.cdl.unimi.it/it/studiare/presentato-piano-di-studio

CURRICULUM: [H16-A] Intensive farming

Further elective courses Curriculum-specific features Intensive farming					
In the third year of the course the student will have to choose four courses from those indicated in the following group for a					
total of 24 cfu.					
Genomics, selection and morpho-functional evaluation	6 AGR/19, AGR/17				
Hygiene and technology of food of animal origin	6 VET/04				
Livestock feeding and environmental impact	6 AGR/18				
Technologies for reducing environmental impact in animal husbandry	6 AGR/09				
Veterinary hygiene	6 VET/05				
Zootechnical legislation and food safety	6 VET/08				

CURRICULUM: [H16-B] Extensive farming

Further elective courses Curriculum-specific features Extensive farming				
In the third year of the course the student will have to choose four courses from those indicated in the following group for a				
total of 24 cfu.				
Alternative farming of poultry and aquaculture	6	AGR/20		
Extensive and pastoral management techniques and product quality	6	AGR/19		
Extensive livestock feeding and grazing	6	AGR/18		
Food safety in processing of farm food products	6	VET/04		
Livestock biodiversity and agroecosystems	6	AGR/19, AGR/17		
Organic animal husbandry and feeding	6	AGR/19, AGR/18
